# Making Race Cars Fast is Hard!

The first 98% of speed is relatively simple.

The last 2% (the difference between winning and being average) can be incredibly complex and expensive! For a 16 second lap, the 2% is the last 3 tenths of a second.

Our goal at DRP is to design and build tools that make the last 2% of Speed:

- Less Complex to Understand
- Easier and Faster to Find
- More Consistent  
& Less Expensive.

At DRP, we DESIGN, DEVELOP, MANUFACTURE & SUPPORT our products in our Bassett, Virginia facility!
